POWER

McGraw-Hill Publishing Co., Inc., 330 West 42nd St., New York, N. Y.

GENERAL INDEX TO VOLUME 89

JANUARY—DECEMBER, 1945

January	Pages 1– 74
February	" 75–146
March	" 147–218
April	" 219–288
May	" 289–358
June	" 359–428
July	" 429–498
August	" 499–568
September	" 569–643
October	" 644–715
November	" 716–787
December	" 788–875
Mid-December	" 876–929b

A

Page

Accidents and accident prevention—Automatic engine stop eliminates fire hazard. G. M. Wilson..... *47

AIR COMPRESSORS

Compressed air cleans roof-tank heater lines. A. G. Wiggins..... *119
Design of marine rotary-compressor power unit. Smith, Soderberg & others *512
Gas engine-compressor lubricating oil saved by circulation and filtering. J. C. Albright..... *39
Little air compressor does big air-supply job. Russell Gross..... *261
Pressure switch insures cooling-water flow. R. Boettinger.....*848
Valve changes eliminate water from cylinder. Joseph Bongdiorno.....*401
Vee packing rings replace square. George Morland *260
Air conditioning—Dry Dock Savings Institution gives better Service with air conditioning *725
American Society of Mechanical Engineers —1945 annual meeting.....*909
Atomic power—The outlook for atomic power plants. P. W. Swain..... 663
Uranium 235—power fuel of the future? P. W. Swain.....*570

B

Bearings

Causes of bearing failures. L. M. Tichvinsky *448
Wire used to gage bearing diameter. L. R. Carry 116

Belts—Guide pulleys provide opposite-rotation short-center flat-belt drives...*452
Quarter-turn flat belts operate with pulleys at right angles.....*734

BOILERS

A.S.M.E. discusses many steam plant problems *911
Air cooling stops refractory troubles. R. W. Riordan.....*542
Air supply to furnaces. A. G. Christie..*313
correction 439
Amines check corrosion in condensate return lines *155
Automatic acid feeder for feedwater. G. D. Dub.....*190
Automatic control for boiler hindered by corrosion. M. N. Gozdenovich....*758
Auxiliary blowdown line protects Hrt. boilers. H. M. Spring..... *47
Blowdown from boiler. Constance, Waterman, Butcher, Holaby, Haynes, Dunlea *336
Boiler-tube makes tube-turbine container. S. M. Elonka.....*689
Can boiler output be increased? Summers, Beckwirth *544
Can breeching serve as air preheater? Clark, Wenig, Mullen De Rosa, Morris, Belton *852
Closed water-treatment feeder. J. F. Maher *333
Coal segregation in boiler plants. A. J. Stock *25
Credit for boiler, waterwall designs. J. P. Badenhausen.....208a
Do some old boilers warrant some repair? Barrett, Chamberlain, Creighton, Gassmann, Miller..... 546
Drain helps keep boiler room clean. M. N. Gozdenovich *846
Drainer for stoker-engine simplifies operators' duties. Richard Brown.....*472
Flash tank improves heating operation. Richard Brown *543
How must we connect feedwater heater? Cunningham, Waters, Elkin, Holman, Greer, Wyrouth, Mullen, Parks, Wilkes, Conk, Wenig.....*616
Injectors and pumps. Alex Higgins. (Questions & Answers).....*124
Kobuta synthetic rubber plant licks problems of 65% makeup and 10–40% blowdown *76
Long sheet used fully, improves boiler room operation. H. M. Bradley.....*658
Montaup Electric forced-circulation boiler *842
Prevent costly boiler damage by careful inspection and repair. Oliver Rantanen 257
Pulverized coal firing. Constance, Smith, Rinehart, Webber.....*192
Removing accumulated slag. Moore, Rinehart, Wenig, Webber, Holman.... 122
Sectional forced-circulation boiler fully automatic *243
Slag formation in boiler tubes. D. L. Blatter *22
Testing boiler water. U. C. Fleming Jr. *185
Testing steam-boiler safety valves. J. P. Morrison *123
Three ways to control boiler-fan loading. Sigurd Johnson *660
Trouble with water columns. Di Santo, Osborne, McKane, Meyer, Mullen, Wilkes, Rinehart, Webber, Di Lorenzo, O'Brien, Cunningham, Butcher, Ward*690
Velox boiler development continues....*181
Water heating by tank coils (Power's Data Sheets) *487
What becomes of the flyash? Smith, Wyrough 619
What prevents condensate return? Constance, Brandt, Elkin, McNally, Cone, Holman, Wenig, Muellerleile, Maher, Butcher, Berkness, Exchen, Wilkes...*476
Worn orifice upsets reducing-valve control. R. Boettinger.....*118
Bushings—How to make bushings of sprayed metal *482
Bushings and liners made entirely of sprayed metal *468

C

Cables—Extra length increases ski-hoist-cable life. Richard Brown..... 262
"Mouse" pulls cable through a conduit. N. L. Rea.....*247

CHIMNEYS

Best way to clean chimneys. Bongiorno, Smith, Conk, Thuman..... 266
Chimney and breeching sizes (chart). W. A. Shoudy..... 742
Stacks rebuilt without halting service.*446
Chute for coal in plastic model. Wolf & Hohenstein *506

COAL

Bituminous coal as fuel for gas turbine. J. I. Yellott.....*509
Britain points road to coal savings.....*457
Coal-flow studies in plastic models point way to nonplugging designs. Wolf & Hohenstein *506
Coal sampling. Morris, Sloane, Wenig..*765
Coal segregation in boiler plants. A. J. Stock *25
Fuel-equipment advisers would reduce design errors. E. C. Payne.....*536
How to convert proximate coal analysis into ultimate. G. C. Boyer.....*173
Inclined screw with swinging spout solves handling problem, saves labor. R. R. Will.....*657
Mobile equipment handles big coal-piling at Polymer Corp. synthetic rubber plant *176
New coal classification and its use. Tom Marsh *254
New coal reserves help relieve Alaskan shortage 213b
Portable sprinkler kills coal-pile fires. Davidson & Elwell.....*688
Practical proposal no fuel forums. C. E. Miller *839
Proximate analysis and Btu with home-built apparatus. K. M. White.....*463
Pulverized coal firing. Constance, Smith Rinehart, Webber *192
Pulverized-coal firing suggestions. A. R. Eastcott 343
Pulverizing coal by steam expansion...*916
Suggested bulletin to promote coal conservation *171
Tractor handling methods solve many coal-storage problems. E. Abramson.*524
Weighs coal on platform scale. M. N. Gozenovich *472
What power engineers should know about coal crushers and crushing. W. G. Hudson.....*666
Coal—see also Fuel

COMBUSTION

Air supply to furnaces. A. G. Christie.*313
correction 439
Combustion control system for Kobuta synthetic rubber plant..... *76
Combustion data in convenient form. P. W. Swain (tables)..... 607
How to convert proximate coal analysis into ultimate. G. C. Boyer.....*173
Sure-fire forms for combustion calculations. G. C. Boyer pt. 1 *15 pt. 2....*110

CONDENSERS

Charts speed surface condenser calculations. W. C. Woodman.....*368
Condenser doctor puts monkey glands into aging tubes. S. A. Tucker..... *37
Condenser with cracked tail pipe passes water into exhaust pipe. C. B. Hudson.*685
Know steam-jet air ejectors and they'll serve you well. Philip Freneau.....*372
Multi-stage ejectors for high-vacuum performance. Phil. Freneau.....*443
Steam-ejector check chart (Power's Data Sheets) 347
Tube cleaner for every job.....*757

CONTROLS

Electronic control gives dc motors wide speed range on ac power. B. J. Dalton. *160
Electronic maximum-demand controller saves $2400 a year.....*434
Hydraulic system starts emergency diesel automatically *184
Measuring and controlling liquid level. E. W. Feller.....*221–242
Pressure switch insures cooling-water flow. R. Boettinger.....*848
Relay puts synchronous motors in service quickly. W. R. Wickerham.....*310
Sectional forced-circulation boiler fully automatic *243
Temperature conversions. R. J. MacMeekin 201
Wind tunnel, California, master control room *838
Cooling towers—Operation of Burbank cooling towers. E. J. Strickland..... *96
Sinclair's Houston butadiene plant—induced-draft cooling tower. L. L. Raymer *6
Corrosion control with cathodic protection —I. P. Sudrabin.....*728

COSTS AND PERFORMANCE

Electronic maximum-demand controller saves $2400 a year.....*434
Log sheet used fully, improves boiler-room operation. H. M. Bradley.....*658
Rejuvenating out-dated hydraulic turbines with modern runner designs. H. S. Van Patter.....*654
Replacing old pumps with new ones cuts power and operating costs..... *10
Valve company provides added services with 24% less fuel. J. J. Fitzgerald..*327

D

Drawing, isometric, for power engineers. Phil. Swain *99–106

(*) Illustrated. (Ed.) Editorial

Page

E

Edwards, George, Animal law, 415. Binder of continents, 776. Curiosity, 485. Engineering-wise, 627. The fifth horseman, *59. Good old days???, 345. Golden rule, 922. Let's be practical, 704. Not the best teacher, 555. Power-plant pumps, 131. Second revolution, 275. Too much Me, 864. War to end wars, 203.

EJECTORS

Know steam-jet air ejectors and they'll serve you well. Philip Freneau.....*372
Multi-stage ejectors for high-vacuum performance. Phil Freneau.....*443
Steam-ejector check chart (Power's Data Sheets) 347

ELECTRICITY

AIEE meeting reviews in layout for reliable power supply.....*182
Armature insulation-resistance probe ferrets out trouble spots. C. Weil...*112
Balances three-wire system with pump motor. R. W. Riordan.....*330
Blowing of fuses confuses electrician. J. B. Mullins.....*402
British power-transformer practice.....*531
Cleaning motor windings. J. B. Mullins 189
Commutator brush performance improved by correct temperature. W. C. Kalb *41
Copper-oxide rectifiers used on pipeline. 673
Correcting field-pole polarity. J. Bongiorno 208c
D. C. generator vibration caused by split-sleeve coupling. N. L. Rea..... 400
Destroyer escort lives again to power Allied Cherbourg drive. J. L. Hart..*534
Drum protects pump motor. R. W. Riordan *472
Electronic control gives dc motors wide speed range an ac power.....*160
Electronic fence keeps fish out of power canal *322
Electronic maximum-demand controller saves $2400 a year.....*434
Exposed water line heated electrically to avert freezing. A. R. Gruehr.....*689
Fit fluorescent lamp characteristics to power supply. R. R. Wylie.....*605
Flashlight batteries revived by home-made charger. J. N. Porter.....*471
Fluorescent flashing is a danger signal. R. R. Wylie.....*681
Generator used as synchronous condenser to correct power factor. Elkin, Mathews, Demere, Coulden, Riggs, Abel *406
Heat in conduits caused by eddy current. R. O. Spencer..... 540
How to set interpole machine brushes..*129
How to test commutating field adjustment *412
Infra-red heating conditions motor insulation. M. A. Myer.....*615
Interlock field rheostat wtih motor starter. J. B. Mullins.....*472
Jacks lift heavy cable spools.....*846
Magnet for research.....*862
Motors act as phase converters. L. R. Carry *403
Motor and capacitor have leading power factor. G. D. Noiles..... 201
Motors rewound on coil form. R. Boettinger *188
Old generator improves power factor. R. Boettinger *44
Performance tests of 2000-kw closed-cycle unit. Prof. Quiby.....*516
Power highways. F. A. Annett...*585–600
Proposed standards for turbine-generators *183
Relay puts synchronous motors in service quickly. W. R. Wickerham.....*310
Semi-outdoor design for modern stations. Lowe & Hoyt.....*297
Skip hoist, full-automatic, serves four storage silos. Gilbert Lindgren.....*573
Solderless connector lugs make tap connections. R. Boettinger.....*116
Squirrel-cage motors with automatic or manually started clutches for many power applications *18
Stoker switchse prevent backfire. R. Boettinger *612
Terminal board simplifies electric circuit testing. Gilbert Lindgren..... *45
Ticking sound in generator. R. W. Riordan 470
Transmits power 2-wire and converts to 3-wire. R. O. Spencer.....*332
Truing sliprings cures voltage trouble. A. V. Kilpatrick.....*470
Voltage-regulator springs disintegrate. George Holman *761
Water-rheostat load tests 2500-kw diesel-driven generators. J. L. King. *82
What causes motor overload? Roberts, Bachmann, Mathews, George, Bauman, Riggs, Cauldron, Norman.....*120
Will the motors work in parallel? Webber, Bongiorno, Norman, Elkin, Waterman, Roberts, Butcher.....*474
Wind tunnel, California, master control room *838

ELEVATORS

Babbitted nuts replace bronze on elevators. Frank Schlieff.....*613

Page

Regrooving traction elevator sheave stops hoist-rope slippage. McGraw-Hill building. Frank Schlieff.....*397
Wood block corrcets elevator selector. Frank Schlieff *686
Engineers—Cleveland School gives successful 4-year course for operating engineers *755
What goes with the title "Chief Engineer?" Willaim Meincke.....*467

ENGINES—DIESEL AND GAS

Capture of German U-boat reveals diesel details. G. H. Memefee.....*664
Checking exhaust temperature tells operating story on diesels and gas engines *248
Diesel and gas engine fuels and combustion. L. R. Rowley.....*375–390
Diesel head and liner maintenance. G. H. Menefee *737
Diesel jacket water supplies hydroblast unit in factory fo Cooper-Bessemer Corp. 172
Diesel-powered welding barge speeds shipyard operations *30
Easy-to-use indicators keep diesels at peak efficiency *113
History of the gas-diesel. L. N. Rowley*290
How does supercharging affect diesel-engine design and operation? R. L. Boyer *448
How to maintain diesel pistons and rings. G. H. Menefee..... *7
Hydraulic drives. F. A. Annett.....*163
Hydraulic system starts emergency diesel automatically *184
Increased cooling surface steps up load. J. F. Maher.....*614
New developments in diesel engines.... 917
New developments spotlight the gas-diesel. L. N. Rowley.....*290
New gas-diesel design cuts fuel consumption 216a
One pressure gage serves two diesel engines. W. T. Mullen..... *89
Operators' guide to diesel lubrication..*576
Switzerland reports on four years of research. S. A. Tucker.....*716
Valve seat problem. J. F. Maher.....*759
Water-rheostat load tests 2500-kw diesel-driven generators. J. L. King.. *82

ENGINES—STEAM

Bracing strengthens steam engine frame. S. M. Elonka.....*189
Cause of engine racing. McNally, Rixman, Paterson, Plotts, Gassman, Fontaine, Creighton, Smith, Bender.....*404
Compound packing ring seals piston. George Holman *849
Drainer for stoker-engine simplifies operators' duties. Richard Brown...*472
Improvised jack turns steam engine. R. W. Riordan.....*260

EQUIPMENT

Absorbent material 484
Air cleaner 138a
Air control 352c
Air drier *283b
Air filter 866c
Air guns *351b
Alarm system 860
Angle plate, lathe.....*780c
Apron, acidproof 210b
Apron, industrial 868a
Apron, lightweight 68a
Ash-handling system *202
Ballasts, disk-shaped 710b
Bearing, bronze bushed.....*710a
Bearings, carbide 779b
Bearings, self-lubricating *484
Belt dressing, liquid.....563c
Belting, open-end V..... 413
Bit, expansive 494b
Blower, forced-draft 67a
Blower, lightweight *350c
Blower, portable *866c
Blower, pressure 353c
Boiler control panel.....*351a
Boiler, packaged 779c
Boilers, portable 554
Boring bar *210c
Brake block 699
Brakes, shoe *710b
Bulldozer 867b
Burn treatment 209b
Burr-removing tool *140a
Bushing, insulated 350b
Cable connector 344
Cable connectors 708c
Cable terminator *210c
Calculator, hardenability 414
Capacitors, auto-switch *413
Capacitor brackets *779b
Capacitors, paper-dielectric *350a, *483, *493c, *554
Capacitors, parallel-plate *281-c
Cement dustproofer 633c
Chain slings 709b
Chromium plating 353a
Circuit tester 353c
Circuit tester 626
Clamp fixture *282b
Clamp, test *283c
Cleaner, air-filter 493a
Cleaning powder 563c
Clutch, mercury 421c
Coating, exterior 633a
Comparators, chlorine 708a
Comparator, polyphosphate *492c
Compressors, blowers, fans.....*625
Compressor head 494c
Condensate return system.....*69b
Condenser, steam *58

Page

Conductivity cell 860
Connectors, cast 494b
Connectors, aluminum power.....*137c
Connector, electrical *138a
Connector lug 283a
Contactor *700
Contactor, oil-immersed 563a
Control, damper smoke.....*483
Control, electronic concentrate.....*69a
Control, electronic motor.....*414
Control, electric contact..... 67c
Control, photoelectric *625
Controller, heat *860
Controls, remote 209c
Control units *424a
Controllers, potentiometer *635a
Controller, temperature recorder.....*130
Conveyor, all-purpose 69b
Conveyor lubricant 700
Conveyor, bulk-material 483
Cooler, liquid *861
Cooling towers *68b
Counterbore set *867a
Coupling, overload release.....210b
Current transformers *533
Cutters for tool holders..... 69b
Damping unit *633b
Detachable fittings 139b
Diaphragm cloth 709b
Diesel engines *560c
Diesel engine *64a
Diesel fuel-oil concentrate.....635c
Diesel plant *553
Drawing board 867c
Drill grinder 284c
Drill, portable electric.....353b
Drive, variable-speed *420c
Dual fuel engine.....*209b
Electric speed indicator.....352c
Electrical connectors 708a
Electrical repair kit.....353a
Electrode 633a
Electrodes 626
Electrode, cutting 699
Electrode holder 562c
Electrode holder 139a
Electrode, phosphor-bronze 781b
Electrode, shielded-arc 780a
Electronic heater *202
Electronic recorders *554
Engine, dual-fuel *274
Engine-pressure indicator 635c
Fabric spat 67b
Fans, axial-flow 422a
Fans, centrifugal 130
Fan, control 867b
Fan units 283b
Feedwater deaerator 780b
File cleaner 421a
Filter, interstage 58
Filter, low-and high-pass.....*352c
Filter and weatherhood.....*140a
Filtration process 138b
Fin-fan cooling unit.....*561b
Fire extinguishers *708c
Fire extinguisher decals 68c
Firebox flame indicator.....423c
Fire extinguisher 414
Fire extinguisher, mobile.....*350a
Flange, detachable *351c
Floor-cleaning products 494c
Flow indicator *274, *492b
Flow tube 353c
Flowmeter, propeller 699
Fluorescent fixture *352a, 423a
Foam chamber *137a
Frequency changer 202
Fuse links 633c
Fuse, non-renewable *423c
Gage-pointer adjuster 633a
Gage, pressure 136c
Gage, vacuum *700
Gasket, asbestos 866c
Gaskets, chromate 137c
Gasket material 708b
Gear pullers *634c
Gearshift drive *423c
Generating set *483
Generator, high speed *66c
Generator, revolving field.....*554, *773
Generators, small *202
Glass fiber mats.....*560c
Glove, safetv 634b
Goggle, safety 139c
Grinder, gasket seat.....*707c
Grinding wheel dresser.....*781c
Hand tool 421b
Heat exchanger 868a
Heat exchanger 422c
Heat-recovery silencer *344
Heater, direct-fired 562b, *772
Heater, portable *281c
Heater, unit *352b
Hoist, coal-slicer 563a
Hoist drive 635c
Hoist, electric 68c
Hole-cutter kit 709c
Hooks, wire belt.....562b
Hose clamp *353c
Hose clamps *138b
Hose coupling 708c
Indicating instruments *421b, *494b
Induction heater 344
Infra-red units 707b
Insulated brush 66b
Insulation gun 58
Insulation, mica ceramic.....137a
Insulation tester *772
Insulation tester *352b, *422b
Jack, flange 773
Junction boxes 282a
Ladder, aluminum 424a
Lamp, filament *779c
Lamp, fluorescent 67a, 282b, 781a
Lathe, bench *781b
Lathe, gear cabinet.....*210b

(*) Illustrated. (Ed.) Editorial

Page

Light, fluorescent ballasts....781c
Light, indicating *282a
Lighting fixture *282b
Lighting, obstruction *284a
Lighting unit, emergency....*561c
Lightning arresters 708b
Link joint 562a
Lubricant, stopcock 779c
Lubricating agent 130
Lubrication fitting *625
Lubrication unit *554
Lubricator, constant-level 66c
Magnetic strainer 420c
Mallets and hammer faces....137b
Measuring instruments *554
Metal deoxidizer 867c
Metallizing gun *707b
Meter, electrical ratio.... 68c
Meter, miniature *353b
Meter tester *493c
Motor, dc *861
Moisture detector *136b
Motor, explosion-proof *58, *422c
Motor, fan *709c
Motor-generator set *625
Motor, protected *202
Motor, vertical *772
Nitrate comparator *861
Nozzle, dual-stream 422c
Nozzle, mixing *67c
Nozzle tester *709a
Oil concentrate 138b
Oils, diesel 413
Oil separator *414
Oiler, gravity-feed 414
Oscillograph *349c
Oxygen indicator *211a
Packing, flax 353b
Packing, hydraulic 626
Packing, mechanical 423a
Packing, plaited 414
Paint, corrosion-resistant 780c
Paint, flameproof 137a
Paint, floor 561c
Paint guide *353a
Panel instruments *421, 493a
Photo dryer *562b
Pillow block *282c
Pins, self-locking 283c
Pipe couplings *700
Pipe-joint compound 494c
Pipeline strainer *860
Pipe seals 635b
Piping template *209c
Planimeter *633c
Plastic, cold-setting 634c
Plastic film 780a
Plastic packing 67c
Plating, copper 136b
Positioner, hand-operated *283a
Power-line carrier system.... 130
Power supply units....139c
Power tube 130
Preheater, bulk-tank 773
Pressure-gage tester 562a
Pressure indicator 422a
Pressure instrument 780c
Pressure transmitter 699
Pukps, controllable capacity....210a
Pump, diffuser *344
Pump, dry-air *635b
Pump, gear 861
Pump, gearless *780a
Pump, material *210a
Pump, motor *58
Pump, proportioning *868a
Pump, rotary 562c, *772, 867c
Pump, screw *130
Pump, shuttle *773
Pump strainer 781b
Pump, two-stage jet....*350b
Pumping system *413
Pushbuttons, oiltight *493b
Protractors *137b
Pyrometer, radiation 351c
Recording instruments *350c
Rectifier, low-voltage *626
Rectifier, selenium *211a, *772
Rectifier unit *421c
Rectifier unit *67a
Refractory, maintenance 710a
Regulator, temperature 860
Relay, control 635b
Relay, electronic *625
Relay equipment 563b
Relay, frequency 137c
Relay, magnetic *780b
Relay, multi-contact *483
Relays, plate-circuit *781a
Relay, reverse-current *423a
Review of power and mechanical equipment *877
Rivet, tubular 860
Roof coating 563a
Rotor *634b
Rust inhibitors 709a
Rust remover 494c
Rust solvent 68a
Safety valve 554
Safety vents *781c
Scale, high-weighing 138-a
Scale, swivel-head 136c
Screen, stainless-steel *351b
Seal, elastic sleeve....563b
Sealing compound 867b
Sealing strip 136c
Seating material 866c
Shaft seals *773
Sheave, V-belt *708a
Slide rule 860
Slime inhibitor 710b
Slings, level-lift 352a
Slip clutch 282a
Smoke stack 422b
Smokemeter, exhaust *414
Soldering iron 861
Solvent cleaner 137a

Page

Speed reducer, worm gear.... 66b
Splice, safety *494a
Spot-weld process 860
Starter, combination 413
Starter, reversing *626
Steam condenser 561b
Steam-cleaning compound 562a
Steam trap 772
Steam trap 351a, *422a
Steam treatment 867a
Stokers, spreader 352a
Stoker, spreader *139a
Strainer, magnetic *632c
Strainer, plug-cock *493b
Stroboscope *283a
Switch, disconnect 779b
Switch, environment-proof 561a
Switch, pressure *484
Switch, renewable 861
Switch, safety disconnect....*282c
Switch, snap 626
Switch, thermostatic *484
Switch, time *708b
Tachometers, hand *344, *699, *861
Tachometer, portable *483
Tank heater 423b
Tape, transparent 561c
Temperature exchanger *626
Temperature-regulating unit *139b
Terminator, dual-purpose 209c
Test set *423b, *484, 553, 867a
Tester, circuit *492c
Thermocouple, platinum 563c
Thermometer, dial *700
Thrust recorder *699
Timer, preset interval *68a
Timer, weld and sequence....*67b
Transformer, air-cooled *68b
Transformer, output *562c
Transmission, variable-speed *553
Truck, lift *867c
Tube, rotameter *493a
Tubing, stainless-steel 138c
Turbine blades 137b
Vacuum pump or compressor....*274
Valve actuator *700
Valve, air-operated 710a
Valve, check *699
Valve, check 344
Valve, diaphragm relief.... 414
Valve, high-lift pop.... 274
Valve-position indicator 69a
Valve, relief *635a
Valve, safety 66b
Valve-spring depressor *861
Vibration control 351c
Vibration mount 67b
